PROFESSIONAL SUMMARY

Data and business analyst with four end-to-end BI projects and two industry job simulations (PwC, Quantum). Builds star-schema models, DAX measures and RLS-secured dashboards from multi-table SQL sources, plus automated analytics pipelines that convert raw data into KPI scorecards and business recommendations. Backed by a HackerRank SQL Gold badge and an upstream operations internship at ONGC.

TECHNICAL SKILLS

Power BI: Power BI Desktop and Service, DAX measures and calculated columns, Power Query M transformations, KPI scorecards, slicers, drill-through, row-level security (RLS), dataset refresh monitoring

Data Modelling: Star schema design, fact and dimension tables, relationships and cardinality, aggregation and performance tuning

Statistics & Analysis: Descriptive statistics, funnel and cohort analysis, uplift and A/B testing, time-series aggregation, segmentation, root-cause analysis

Programming & Querying: SQL (MySQL, PostgreSQL, SQLite, DuckDB) - joins, CTEs, window functions, aggregation; Python (Pandas, NumPy); C

Analytics Engineering: FastAPI, REST APIs, data profiling and cleaning, exploratory data analysis, unit testing, Git/GitHub, CI

Excel: PivotTables, Power Query, VLOOKUP/XLOOKUP, conditional formatting, dashboard reporting

AI & Automation: LLM APIs, prompt design, RAG, automated insight generation

Reporting: Data storytelling, KPI definition, stakeholder reporting, client walkthroughs

PROJECTS

Namma Yatri - Ride Booking Funnel & Demand Analysis | SQL, Power BI, Excel 2026

- Traced a 2,161-search booking funnel across a 5-table schema, isolating the fare-estimate stage as the largest drop-off at 403 lost searches - three times the combined loss from driver and customer cancellations.
- Wrote 45 analysis queries using partitioned RANK and DENSE_RANK window functions to rank pickup areas, routes and driver earnings, verified across MySQL, SQLite and DuckDB; implemented row-level security restricting dashboard access by pickup area.

Zomato - Cuisine Popularity & Top Orders Analysis | SQL, Power BI, Excel 2026

- Analysed multi-table restaurant and order data across users, ratings, cuisine mix and order volume, cleaning and joining raw records to rank the highest-order cuisines and outlets.
- Built Power BI and Excel reporting views of demand and rating patterns, converting them into menu and promotion recommendations.

AutoBI - Automated Business Intelligence Platform | Python, FastAPI, Pandas, DuckDB, PostgreSQL, Next.js | [Live](#) 2026

- Built an analytics platform that converts raw CSV/TSV uploads into interactive dashboards, automating data profiling, cleaning, KPI discovery and chart recommendation through a FastAPI and Pandas/DuckDB pipeline.
- Shipped dashboards with dynamic filters, daily-to-yearly time aggregation, saved views, shareable links and PDF/Excel/CSV export, backed by PostgreSQL persistence and 241 automated backend tests; deployed on Render.

Netflix - Subscriber Engagement Dashboard | Power BI, Excel 2026

- Analysed catalogue engagement by genre, rating, release year and top 10 producing countries to isolate the segments driving viewership.
- Designed an interactive Power BI dashboard with bar, area, tree map and donut visuals plus slicers for a single-screen view of trends.

EXPERIENCE

Intern - Oil and Natural Gas Corporation (ONGC), Ankleshwar Asset May - Jul 2025

- Analysed SCADA-based real-time field monitoring data across gas gathering, three-stage compression, dehydration and metering, tracking operational parameters across upstream production facilities.
- Worked with technical teams on structured problem-solving for production and artificial lift performance reviews, translating field observations into operational efficiency findings.

LEADERSHIP & ACHIEVEMENTS

President - ShutrX Photography Club, IIPE Jul 2025 - May 2026

- Led a 25+ member team through a full rebrand, growing fest participation 156% (90 to 230+) and digital reach to 60K+, establishing the club as the institute's official media body.
- Owned a Rs. 3L annual budget at ~93% utilisation with zero overruns, running GeM portal procurement, vendor coordination and 100% audit-ready documentation.
- Planned event calendars and delegated work across sub-teams, reporting outcomes to faculty and institute administration.

Public Relations Officer - SPE Student Chapter, IIPE Jul 2024 - Mar 2025

- Coordinated outreach, speaker communication and event promotion across faculty, industry and student stakeholder groups.

EDUCATION

B.Tech, Petroleum Engineering - Indian Institute of Petroleum and Energy (IIPE), Visakhapatnam | CGPA: 6.29 2026

Class XII (CBSE), PCM - Narayana College | 80.5% 2021

CERTIFICATIONS

- Power BI Job Simulation - PwC (Forage): Power BI dashboards, Excel control testing, gap analysis and client walkthroughs
- Data Analytics Job Simulation - Quantum (Forage): retail transaction data cleaning, uplift testing in Python, Pyramid Principle reporting
- SQL Gold Badge - HackerRank | Data Business Analytics Specialization - Jobaaj | Excel Skills for Business - Macquarie University
